

BALJEET SINGH

Senior Software Engineer | Full Stack Developer

Phone: +91 86850 07017 | Email: baljeetgunghas5@gmail.com | LinkedIn: [linkedin.com/in/baljeet-gunghas](https://www.linkedin.com/in/baljeet-gunghas) | GitHub: github.com/BaljeetGunghas | Portfolio: baljeetgunghasportfolio.netlify.app

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of experience developing high-performance full-stack web applications using **React.js**, **Next.js**, **Node.js**, **Express.js**, **TypeScript**, **MongoDB**, and **SQL**. Proven expertise in architecting scalable RESTful APIs, responsive UI engineering, robust RBAC authentication, real-time messaging systems, and Generative AI integration using **LangChain** and **LLMs**. Strong background in automated testing, performance optimization, and cross-functional team leadership delivering enterprise-ready solutions.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend:	React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, SCSS, Responsive Web Design
Backend:	Node.js, Express.js, RESTful APIs, Microservices, Authentication, RBAC
Databases:	MongoDB, MySQL, PostgreSQL, SQL Server
AI & LLM:	Generative AI, LangChain, LLM Integration, AI Assistants, Chatbots, Prompt Engineering
Tools & DevOps:	Git, GitHub, Postman, Figma, VS Code, CI/CD, Netlify, Vercel
Core Engineering:	API Integration, Real-Time WebSockets, Unit Testing, Debugging, Web Performance Optimization, SEO

PROFESSIONAL EXPERIENCE

Senior Software Engineer II

Jun 2025 – Present

NIIT

- Architect and maintain full-stack web applications utilizing React.js, Next.js, Node.js, Express.js, TypeScript, and MongoDB, delivering highly scalable enterprise solutions.
- Build robust RESTful APIs, high-performance backend microservices, reusable UI component libraries, and secure role-based application workflows.
- Integrate Generative AI and LLM capabilities using LangChain to power interactive AI assistants, intelligent chatbots, and automated skill assessment modules.
- Implement multi-tenant authentication, Role-Based Access Control (RBAC), WebSockets real-time communication, automated testing, and backend performance tuning.
- Engineered AI-enabled Learning Management Systems (LMS) tracking user journeys, skill proficiency matrixes, course data, and progress reporting.
- Collaborate with product designers and business analysts to translate complex functional requirements into production-ready software features.

Full Stack Engineer

Feb 2023 – Mar 2025

Royal Matrimonial

- Developed and deployed high-traffic full-stack web applications using React.js, Next.js, TypeScript, Node.js, and SQL databases.
- Engineered core features including multi-criteria search algorithms, advanced filtering, partner recommendations, user interest management, and automated matchmaking workflows.
- Integrated real-time messaging, instant push notifications, user blocking systems, and secure user data authorization rules.
- Implemented Razorpay payment gateway integration for subscription monetization and optimized database querying and SSR load times by 35%.
- Designed strict granular privacy and access controls to restrict sensitive profile parameters (phone numbers, email addresses, media) based on mutual connection status.

Frontend Engineer

Oct 2022 – Feb 2023

GoMechanic

- Designed and developed 20+ responsive, pixel-perfect web pages using React.js, Next.js, TypeScript, Tailwind CSS, and SCSS based on Figma prototypes.
- Built a modular library of reusable UI components and streamlined REST API consumption to elevate overall application responsiveness.
- Improved web vitals, cross-browser compatibility, page speed optimization, and front-end maintainability across desktop and mobile devices.

Frontend Engineer

Jun 2022 – Oct 2022

FareGarage

- Developed clean, cross-device user interfaces using HTML5, CSS3, JavaScript (ES6+), and Bootstrap.
- Maintained and enhanced key user-facing modules through continuous bug remediation, UI polish, and performance patches.

Frontend Engineer

May 2022 – Jun 2022

edustoke

- Converted high-fidelity Figma mockups into responsive web interfaces utilizing HTML5, SCSS, and JavaScript.
- Utilized standard Git/GitHub collaborative workflows to commit, review, and ship front-end updates on tight iterations.

SELECTED PROJECTS

Velvet Haven – Full-Stack Room Booking Web Application

[Live Demo](#)

Tech Stack: *React.js, Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB*

- Designed and deployed a full-stack room booking platform featuring geolocation-based room search, dynamic filtering, sorting, and customer review modules.
- Integrated payment processing APIs and automated transactional email notifications for booking confirmations and user communication.

Royal Matrimonial – Matrimonial & Matchmaking Platform

[Live Demo](#)

Tech Stack: *React.js, Next.js, TypeScript, Node.js, SQL, WebSockets, Razorpay*

- Architected full-stack matchmaking application incorporating real-time chat, privacy access rules, payment processing, and SEO-friendly SSR rendering.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

2018 – 2021

Kurukshetra University, Kurukshetra, Haryana

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks.
